

News and updates from LS Retail

DEVELOPMENT

LS Central 21.2 released

This version is built on Microsoft Dynamics 365 Business Central 2022, release wave 2, cumulative update 3, build 21.3.51409.51464.

LS Forecast

LS Forecast has been restructured. The master data synchronization and all connections with the LS Forecast cloud app have been removed.

LS Central now depends on 3rd-party solutions to calculate and provide sales forecasts. LS Central holds the historical sales data and the master data. This data can be uploaded to an external demand forecasting engine.

PARTNER OPERATIONS

Local currency pricing update for EUR and GBP

To adjust for local currency fluctuations and harmonize prices we are announcing a pricelist change for EUR and GBP following the Local Currency Pricing update [announcement from Microsoft](#). The exchange rate is expected to be reviewed every 6 months and can go up or down as per currency fluctuations aiming toward more consistent global pricing.

Starting April 1, 2023, in the LS Central SaaS and LS Express price sheets, the increase will be for EUR 11% and for GBP 9%.

Granular delegated admin privileges (GDAP) implementation

Following Microsoft's announcement of new Granular Delegated Admin Privileges (GDAP), we would like to inform that LS Retail has now implemented the GDAP model for all our LS Central on BC SaaS and LS Express customers and established a more secure relationship.

As of now, this relationship is only between LS Retail and customers, **not** Partners/Indirect Resellers and customers.

We encourage all our partners to create a GDAP relationship with their customers as soon as possible. [See instructions here.](#)
